The 500 questions in this book are from the 2nd day of the United States Medical Licensing Exam (USMLE). They can also be a useful study tool for the medical student exam for The Step 3 and the National Board of Medical Examiners (NBME) as an indial clerk. For multiple choice questions, the best answer to each question must be selected. For matching sets, a group of questions precedes the list of options written in letters. For each question in the matching set, select a letter option that is most closely related to the question. Each question in this book has a corresponding answer and a brief discussion of the question and the various topics raised by its answer. The list of references for the entire book follows the last section. In order to simulate the time constraint imposed by the profication exams in which this book is designed as a guide to implementation, the student or physician must take approximately one minute for each question. After answering all the questions in a section, as much time should be spent at the end of the section as necessary to review the descriptions of each question. All explanations should be taken care of, even if the review question is answered correctly. Those wishing to learn more about a topic should refer to the reference materials listed or other standard texts in medicine. If you find this book useful then please subscribe and share it. medical pre-test self-assessment and fourte fourth edition review medicine pre-test self-assessment and review of the fourte fourth edition pdf
